Allowable Subject Matter

2. Claims 1, 2, 5-11, 13, 15-21, 24-37 are allowed.

The following is an examiner's statement of reasons for allowance: A life safety alarm, comprising: an alarm housing that houses a system to detect a life threatening condition and alarm electronics; wherein a double acting latch mechanism connecting a battery carrier to the alarm housing, a latch mechanism configured to control pivoting movement of the battery carrier between the closed and open positions the double acting latch mechanism comprises at least one heart shaped cam groove, and a cam follower engaged with the cam groove is disclosed.

While both Elwell and Motojima disclose heart-shaped cam grooves with cam followers, neither Elwell nor Motojima disclose battery carriers pivotally connected to the alarm housing for pivoting movement relative to the alarm housing between a closed position and an open position where a latch mechanism is configured to control the pivoting movement of the battery carrier between the closed and open positions wherein a double acting latch mechanism comprises at least one heart shaped cam groove. Moreover, the prior art indicates that this particular device is novel and has not been published or patented by other entities.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Elwell (US 6,464,437) and Motojima (US 6,572,392) disclose heart-shaped cam grooves with cam followers.
